## THE CAPITOL GROUNDS.

THE WORK OF IMPROVEMENT COM-The work of improvement on the Capitol grounds has been commenced under anthority of an appropriation of \$800,000 in the sundry civil bill, to be expended by the architect of the Capitol "for improvement according to the plans and under the general direction of Fred. Law Olmstead." The trees marked for cut-ting down are now being removed by large parties of men, who are allowed the wood as parties of men, who are allowed the wood as compensation for removal. On next Monday the bids for the sipping down of East Capitol park, from the espisade immediately in front of the eastern facade of the building to First street east, will be opened. At the latter point the cutting down will reach ten feet. The whole amount of earth to be removed in grading is 148,828 cuttle yards. Mr. Oimstead has about perfected his plans for the embellishment of the entire eastern and western parks, but it is thought that the grading will consume the greater part, if not the cuttire season. There are about one hundred builders for the coutract of lowering the grade of the cast park.

that other robberies may be traced to him. Since his capture the detactives have been kept employed in recovering the stolen property. Generally it is the custom after stoling articles to such them into a pawn shop, and dispose of them for almost any sum that the pawnbroker will offer, but this man pursued a different course, and took the goods and sold them wherever he could find a purchaser. In that manner he has managed to get rid of many of them for a very low figure, and at the same time better cover his tracks and make it more difficult for the officers to get at him or the stolen goods.
